 Open to Remote & Relocation

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 5+ years of experience architecting and delivering scalable web applications, SaaS platforms, CRM systems, and cross-platform mobile apps. Proven track record of shipping 50+ production projects for clients across the US, UK, UAE, and Europe. Deep expertise in the JavaScript and PHP ecosystems; comfortable owning the full delivery lifecycle from database design to CI/CD deployment. Passionate about clean code, system design, and measurable business impact.

EXPERIENCE

Senior Full Stack Developer

Jan 2020 – Present

N2R Technologies · Full-time | Noida, UP

- Delivered 1,500+ client projects on time and within scope across diverse industry verticals.
- Designed and built RESTful APIs consumed by React and React Native frontends at scale.
- Implemented real-time features (live chat, notifications, dashboards) using WebSockets and Laravel Echo.
- Established code-review culture and mentored junior developers on SOLID principles and best practices.
- Reduced average deployment cycle from 3 days to same-day using automated CI/CD pipelines.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Bootstrap, CSS, Redux, Context API

Backend: Laravel (PHP), WordPress, REST APIs, WebSockets

Mobile: React Native, Expo, Firebase, Push Notifications, App/Play Store

Database: MySQL, Redis

DevOps: Git, Linux/Ubuntu, Nginx, Apache, Docker, CI/CD, AWS S3, cPanel

Integrations: WhatsApp Business API, Stripe, Twilio, OpenAI API, Google Maps

KEY PROJECTS

 [see full portfolio →](#)

AI WhatsApp Chatbot Platform

Node.js · React · WhatsApp API · MongoDB · OpenAI

Multi-tenant SaaS with AI-powered conversation flows, broadcast campaigns, and analytics dashboard. Reduced manual agent workload by automating intent detection and fallback responses via OpenAI.

Enterprise CRM & Sales Pipeline

Laravel · Vue.js · MySQL · Redis

Full-featured CRM with drag-and-drop pipeline boards, automated follow-up sequences, role-based access control, and a reporting suite. Improved sales team conversion tracking by 40%.

Van & Logistics Booking Platform

Laravel · React · Google Maps · Stripe

Digitized the entire booking workflow for a Swiss transport company — real-time GPS driver tracking, automated invoicing, and Stripe payments processing 100+ daily bookings.

Workforce & Payroll SaaS

Laravel · Vue.js · MySQL · PDF Generation

HR platform covering employee onboarding, attendance, leave management, and automated multi-currency payroll with PDF payslip generation for SME clients.

Crypto Kiosk & Exchange Platform

Node.js · React · PostgreSQL · WebSockets

Real-time crypto exchange with kiosk management, live price feeds, QR-based transactions, compliance reporting, and remote kiosk monitoring dashboard.

EDUCATION

B.Tech – Computer Science & Engineering

2016 – 2020

Dr. A.P.J Abdul Kalam Technical University, Lucknow | 79.8% · 7.15 SGPA
